

### **Recommendation for ESG Perform's evaluation framework and services**

Uturn Recycled Group wished to create a comprehensive report and a plan for improving our activities and outcomes related to ESG (environmental, social and governance) practises. This was increasingly being required by a number of our key stakeholders.

We engaged Professor Danny Samson from ESG Perform Pty Ltd, to conduct this work. Danny used the framework that he had adapted from the American business excellence awards framework to the domain of ESG, which comprehensively covered all the main categories and elements of ESG, in order to give us both a quantitative evaluation score, and a qualitative set of descriptions to go into the report that he produced, of our ESG practises and outcomes.

Further, Professor Samson used his framework and the recommendation bank that he has built to customise a series of recommendations and plans for us, to use in going forward in order to improve the ESG profile and activities of our business over the next few years.

The output of that work was a comprehensive report of some 40 pages, professionally presented, which we are now able to use both with our internal stakeholders and with our customers and professional clients, for example in bidding for new work.

We were delighted with the depth of knowledge and professionalism that Danny brought to this work, and when he presented us with the draft report, it was accurate and of a standard that required no additional editing or modifications, as it was 'good to go'.

We are aware that the intellectual property that he brought to our ESG reporting assignment has now been developed and built into a technology platform and hence is accessible on a more widespread basis. The process that we used was already efficient, and the platform that ESG Perform has now launched, must be even more efficient.

We are happy to highly recommend ESG Perform and Professor Danny Samson's ESG evaluation and advisory services.

Yours sincerely

Tony Rallis
